

Comprehensive Solutions in Steel Structures for Industry and Mining.

Ferma S.A. is an Argentine company based in **Esperanza, Santa Fe Province**, with over **60 years of experience** in developing comprehensive solutions in metal structures. Its approach covers **engineering, manufacturing, logistics, and assembly**, adapting to the needs of large-scale **industrial, logistics, and mining projects** across the country.

It has been managed since its founding by a family of professionals with strong Swiss roots.

Infrastructure and Technology

The company has a **20,000 m² industrial plant**, equipped with **cutting-edge technology**, enabling a production capacity of up to **1,000 tons per month**. The implementation of the **STRUMIS–TEKLA integrated system** allows for real-time control of each component, ensuring **efficiency, traceability, and on-time delivery** for technically demanding projects.

Ferma stands out as the **only Argentine manufacturer** with this technology fully developed and applied, giving it a **unique competitive advantage** in both **national and international markets**.

Services

- Structural engineering and technical design.
- Manufacturing of steel structures under strict quality standards.
- On-site assembly and specialized technical support.
- Logistics and transportation of large components.
- Resource and subcontractor management in the field.

Mining Expertise

Ferma has become a **strategic supplier** for the **mining industry**, participating in **large-scale projects** located in **high-altitude areas, salt deserts, and remote regions**. Its experience in projects executed above **5,000 meters above sea level**, as well as in **extreme environments**, positions it as a **reliable and technically prepared company**.

Notable mining projects:

- **Minera EXAR – Cauchari-Olaroz (Jujuy):** 4,850 tons.
- **Minera GANFENG – Salar de Llullaillaco (Salta):** 2,200 tons.
- **Minera POSCO – Salar del Hombre Muerto (Salta):** 2,080 tons
- **Allkem – Sal de Vida (Catamarca):** 600 tons.
- **Proyecto Tres Quebradas (Catamarca):** 300 tons.
- **Pascua Lama (San Juan):** 2,000 tons. | At 5,200 masl.
- **Pirquitas (Jujuy):** 1,800 tons. | At 4,200 masl.
- **La Calera (Neuquén):** 800 tons.
- **YPF-MEGA (Buenos Aires):** 1,500 tons.
- **Tecpetrol .** 1,200 tons.

Strategic Presence in Mining

As part of its consolidation in the mining sector, Ferma S.A. has established Ferma Terra S.A., a unit specifically dedicated to the development and execution of mining projects, with operational and legal presence in the provinces of Salta and San Juan.

The creation of Ferma Terra S.A. in these provinces not only strengthens local operational capacity, but also reflects a territorial integration strategy, promoting regional economic development through the inclusion of local suppliers, labor, and services. This vision helps to shorten logistics times, reduce costs, create jobs, and build lasting relationships with local communities and businesses.

Ferma Terra S.A. acts as a **regional platform**, offering **proximity, agility, and operational continuity** in key areas for Argentine mining.

Clients and Sectors Served

Ferma S.A. has been chosen by the country's leading companies in various sectors:

- **Industrial:** Nestlé, Coca-Cola, Arcor, Swift, Volkswagen, Renault.
- **Logistics and commercial:** Frávega, Logística Román, Dot Baires Shopping.
- **Energy and infrastructure:** Techint, General Electric, Central Puerto S.A., YPF, Tecpetrol.

Competitive Advantages

- Strategic location in the productive center of Santa Fe
- Operational capacity under extreme altitude and climate conditions.
- Unmatched technology in the country.
- Efficient production with international quality standards
- Strict compliance with deadlines, safety, and environmental regulations.
- Multidisciplinary professional team with national and international training.
- Direct and personalized technical support throughout every stage of the project.
